

### 6.5.2 List of Collaborative quality initiatives with other institution(s)

Collaborative quality initiatives with other institutions are instrumental in fostering innovation, enhancing institutional capacity, and driving positive change within the academic and professional landscape. These initiatives often aim to leverage the strengths and resources of each institution to achieve common goals, such as improving educational outcomes, advancing research agendas, or enhancing service delivery.

The key aspects of collaborative quality initiatives with other institutions include Shared Resources, Joint Programs or Projects, Knowledge Exchange, Networking and Partnerships and Quality Assurance

Name of the Programme	Collaboration	Objectives
Online 2 <sup>nd</sup> National Level Faculty Development Programme on Learning Technological Trends in Business management with Data Science during May 4-8, 2023	In collaboration with Osmania University	The objectives of this programme was to empower faculty with emerging technologies, promote innovation in curriculum development, enhance pedagogical approaches, promote lifelong learning and professional development, foster collaboration and networking and support institutional capacity building By achieving these objectives, the FDP aims to empower faculty members to embrace and effectively leverage technological advancements in data science within the context of business management education, ultimately enhancing the quality, relevance, and impact of academic programs and research in the field.
